

Federico del Gaudio

Combat & Technical Designer

+39 3914234046 federico.delgaudio37@gmail.com [LinkedIn](#) [Portfolio](#) [GitHub](#) Rimini, Italy - Relocation / Remote

Combat & Technical Designer specializing in Unreal Engine (Blueprints) and Unity, focused on prototyping and iterating on combat mechanics and AI systems, always starting from one question: "Why does this combat feel good?"

WORK EXPERIENCE

Adrias Online

Front-end Developer

February - March 2023

- Delivered a live, WordPress website on schedule, collaborating with the front-end team.
- Adjusted front-end layout and optimized visual assets across site pages.
- Debugged and resolved cross-browser and cross-device compatibility issues.
- Collaborated with the backend team to align changes with site functionality.

EDUCATION

Digital Bros Game Academy - **Game Design** Course

2024 - 2026 - Graduated

ITTS "O. Belluzzi L. da Vinci" - **Computer Science** Diploma (72/100)

2019 - 2024 - Graduated

PROJECTS

One Night in Venice

UE5 - itch.io Game Jam - Solo Project

January 2026

- Created a tight, roguelite-inspired bullet-hell shooter with 4 distinct enemy AI archetypes and a multi-phase boss fight.
- Balanced global time-to-kill values and implemented combat juice.
- Implemented a data-driven progression system using UE5 Data Tables.
- Developed a dynamic difficulty scaling system to manage enemy spawns.

Patch Me If You Can

Unity - Team of 11 - FPS

May - July 2025

- Designed a fast-paced FPS starring a voodoo tailor hunting his runaway creations.
- Designed and balanced harpoon-based combat and traversal mechanics.
- Balanced metrics for 3 enemy AI classes using data from 4 playtest sessions.
- Iterated on encounter pacing based on playtest feedback.

Pummel

UE5 - Solo Project - 2.5D action game

April - June 2024

- Built a 2.5D action game centered around a 3-hit and aerial combo system.
- Integrated 2D animation using Paper2D plugin for Unreal Engine 5.
- Developed combo systems using Animation Blueprints and State Machines.
- Implemented dynamic hitbox and hurtbox registration systems.
- Created damage handling, health management, and player-enemy feedback mechanics.

SKILLS

Engines: Unreal Engine 4/5 (Blueprints, Behavior Trees, Animation State Machines), Unity (C#)

Tools: Git / GitHub / Fork, Visual Studio / VS Code, Confluence, Blender, Jira

Languages: Italian (Native), English (C1)
